SOLUTIONS FOR PROFESSIONALS IN CERAMICS

In our Villa Solutions catalogue, we present an interesting variety of products of a well-defined market trend, that with its quality and sophistication are perfect to dress your areas, both indoor and outdoor.

Dedicated to the real experts in ceramics, those who daily with the best materials to dress their projects. Thus was born Made for Tile Experts by Villa Cerámica, a catalogue in the form of a basic manual on porcelain tile. A manual that contains a unique selection of the best ceramic collections of any type of space, from wood, marble, cement to stone and metal.

The creation of Villa Cerámica is the result of an exciting project based on our long experience in the ceramic sector. We are part of a consolidated company in the market, with more than a decade of learning the latest technologies, quality, service, innovation and design. A company that believes in people and in a job well done, that with its philosophy has not stopped growing since its beginnings and that looks forward to the future.

The Villa Cerámica brand is synonymous with commitment, efficiency and hard work. We are firmly committed to being one of the leading companies in product quality, being at the forefront of design, offering impeccable service and a notorious international presence. Our main objective is to maintain a direct and preferential contact with all our customers, offering them a personal treatment and absolute dedication, in search of their maximum satisfaction and confidence in us and our products.

SOLUCIONES PARA PROFESIONALES DE LA CERAMICA

En nuestro catalogo Villa Solutions les presentamos una interesante variedad de productos de clara tendencia de mercado, que por su calidad y sofisticación son perfectos para vestir sus espacios, tanto de interior como de exterior.

Dedicado a los verdaderos expertos en cerámica, aquellos que trabajan a diario con los mejores materiales para vestir sus proyectos. Así nace made for Tile Experts by Villa cerámica, un catálogo en forma de manual básico sobre porcelánico. Un manual que recoge en su interior, una selección única de las mejores colecciones cerámicas para cualquier tipología de espacio. desde maderas, mármoles, cementos hasta piedras y metales.

La creación de Villa Cerámica es el resultado de un apasionante proyecto basado en nuestra larga experiencia en el sector cerámico. Formamos parte de una empresa consolidada en el mercado con más de una década de aprendizaje en últimas tecnologías, calidad, servicio, innovación y diseño. Una compañía que cree en las personas y en el trabajo bien hecho, que con su filosofía no ha dejado de crecer desde sus comienzos y que mira con ilusión el horizonte del futuro.

La marca Villa Cerámica es sinónimo de empeño, eficacia y trabajo. Apostamos con firmeza por ser una de las empresas punteras en calidad de producto, estar a la vanguardia del diseño, ofrecer un servicio impecable y una notoria presencia internacional. Nuestro principal objetivo es mantener un contacto directo y preferente con todos nuestros clientes, ofreciéndoles un trato personal y una dedicación absoluta, en busca de su máxima satisfacción y confianza en nosotros y nuestros productos.

CEMENTS & METALS
CEMENTOS Y METALES

**A REFLECTION OF THE
PUREST MATERIALS**

Cement and metal, two pure elements whose intrinsic character is part of the innate composition of original nature. With an imposing personality and compact appearance, its combination with other materials creates truly comfortable and welcoming spaces. Discover the essential collections inspired by the most avant-garde cements and metals and let yourself be captivated by their attractive and consistent surface.

**UN REFLEJO DE LOS
MATERIALES MÁS PUROS**

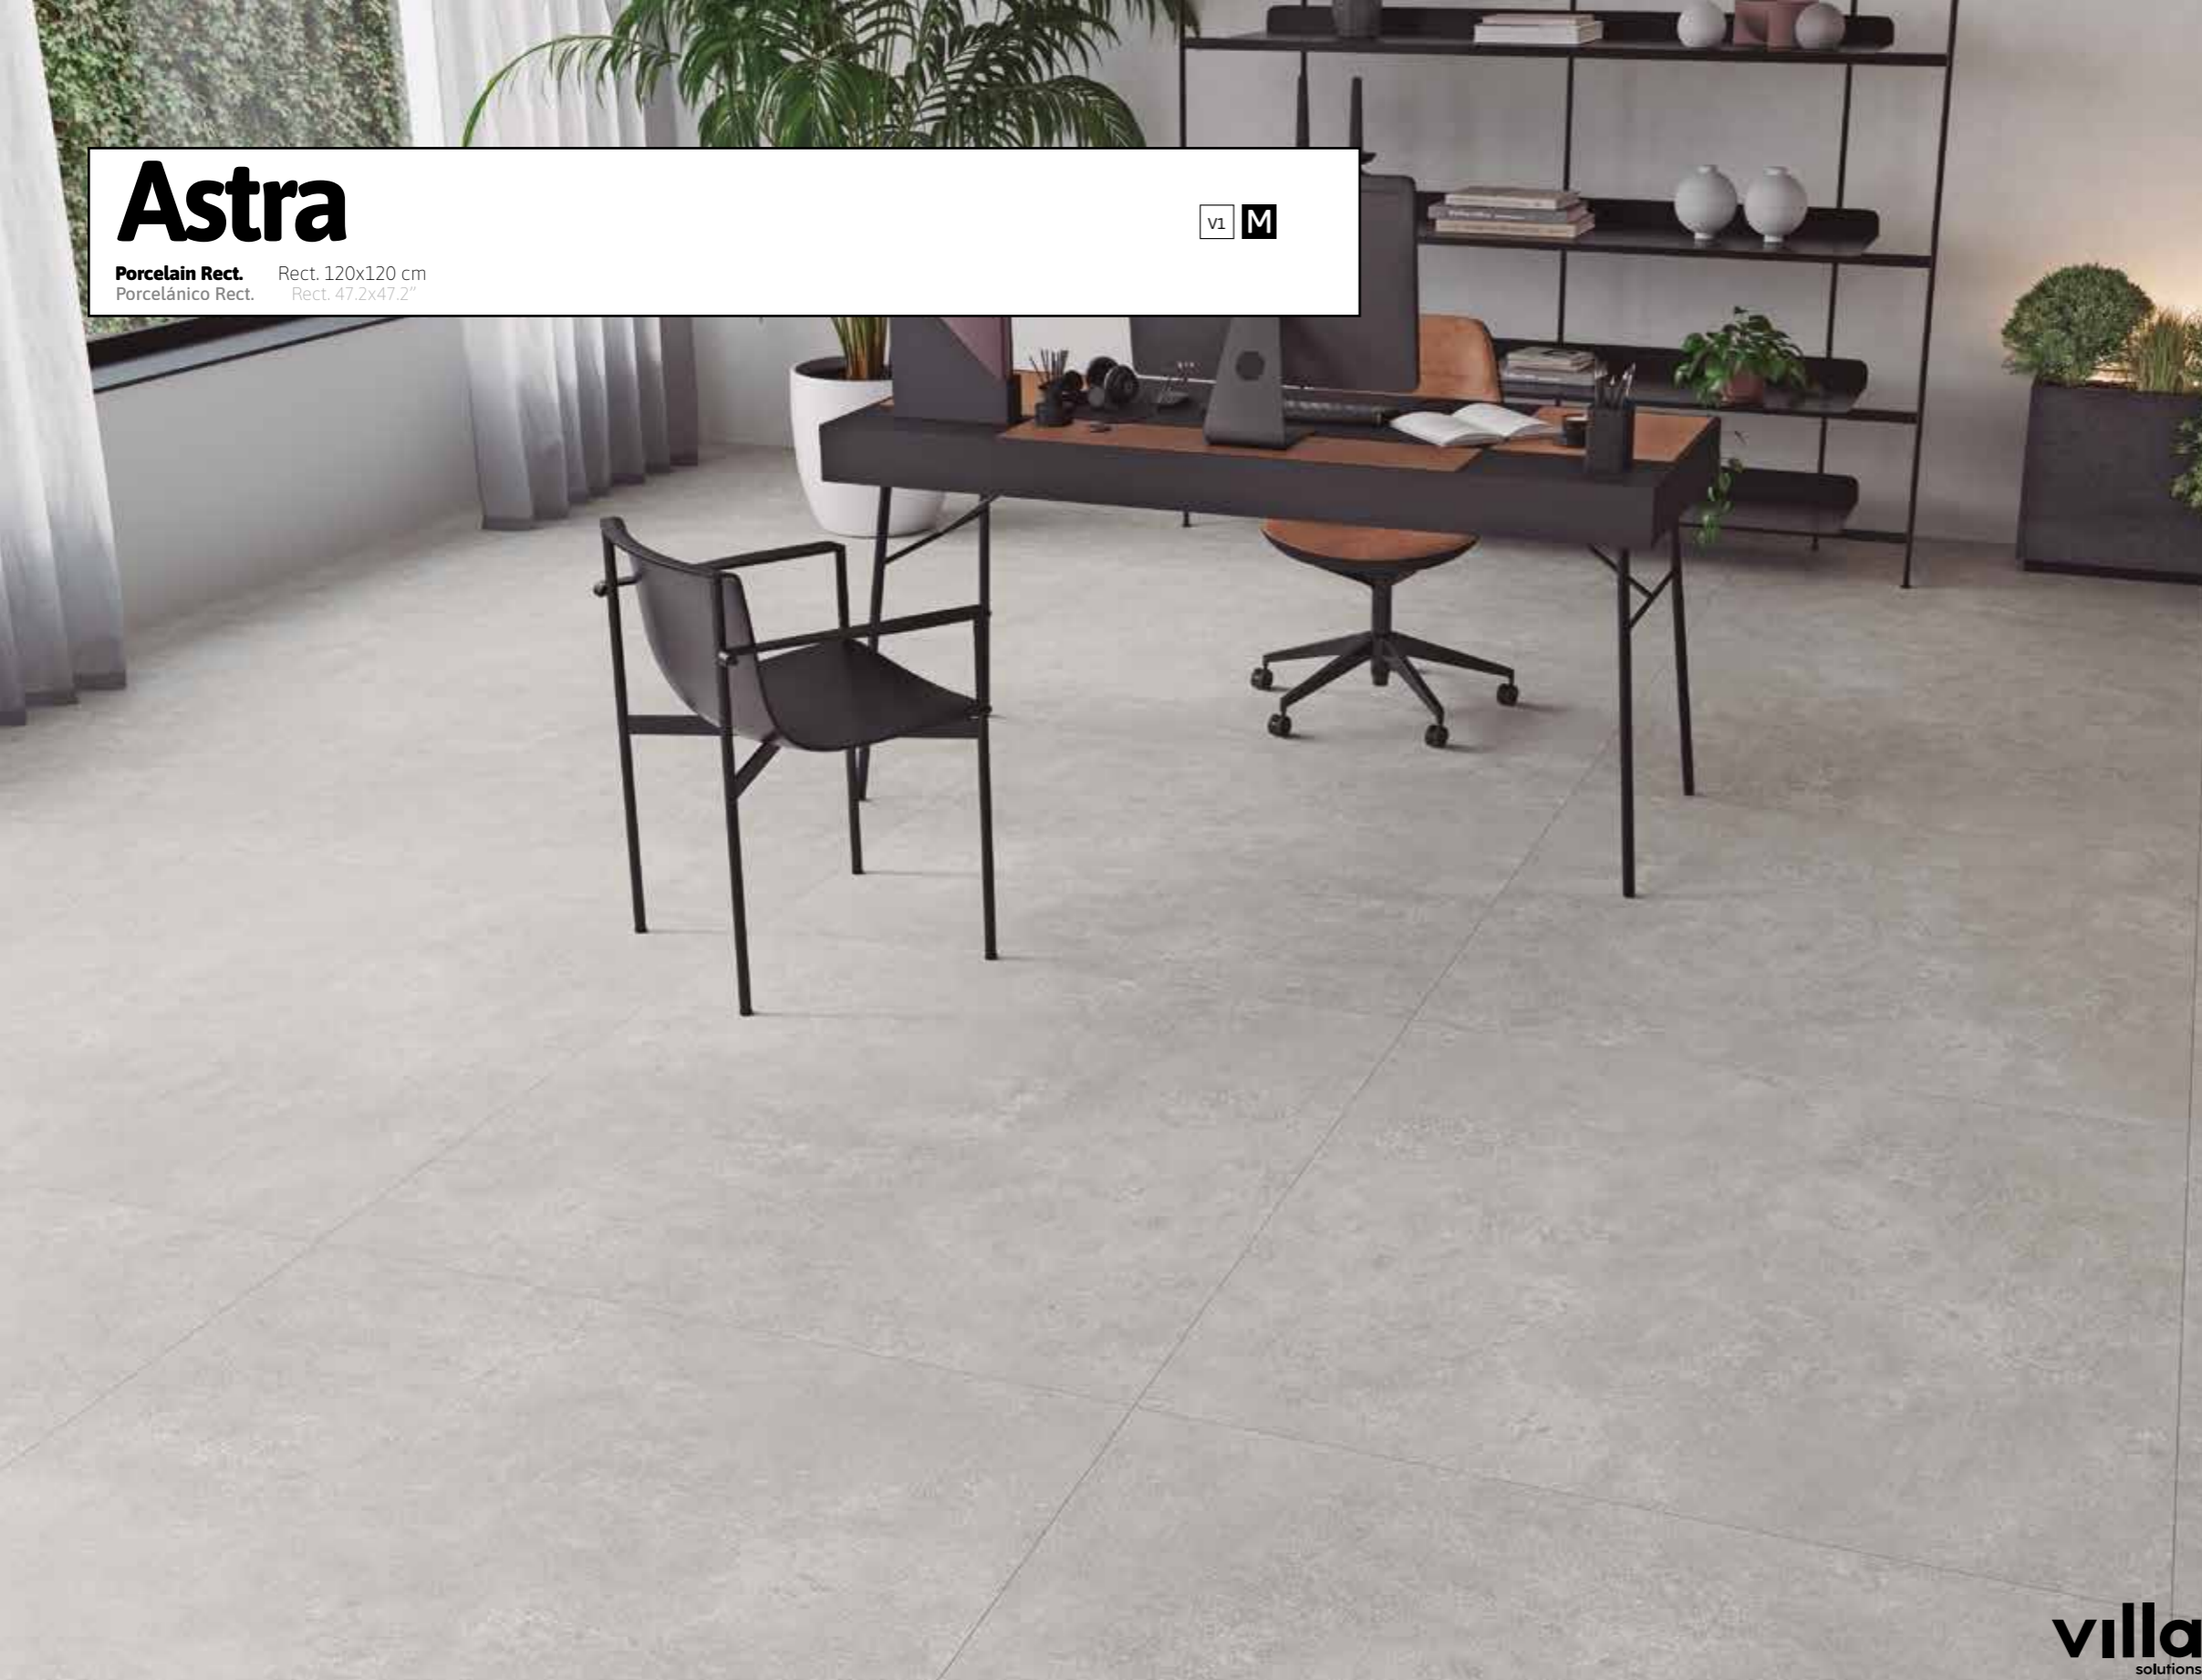

Cemento y metal, dos elementos puros cuyo carácter intrínseco forma parte de la composición innata de la naturaleza original. De personalidad imponente y apariencia compacta, su combinación junto a otros materiales genera espacios realmente confortables y acogedores. Descubre las colecciones esenciales inspiradas en los cementos y metales más vanguardistas y déjate cautivar por su atrayente y consistente superficie.

The background of the right half of the page is a close-up photograph of several vertical metal bars. The bars are heavily rusted, with a dark, textured surface and patches of bright orange and red rust. The lighting is dramatic, highlighting the rough, uneven texture of the metal.

2 CM
2 CM

2 CM NATURAL HARDNESS

We are pleased to present, our 2 cms thickness ranges, based on a natural inspiration. Our cement and stone finishings make them perfect to dress both indoor and outdoor spaces.

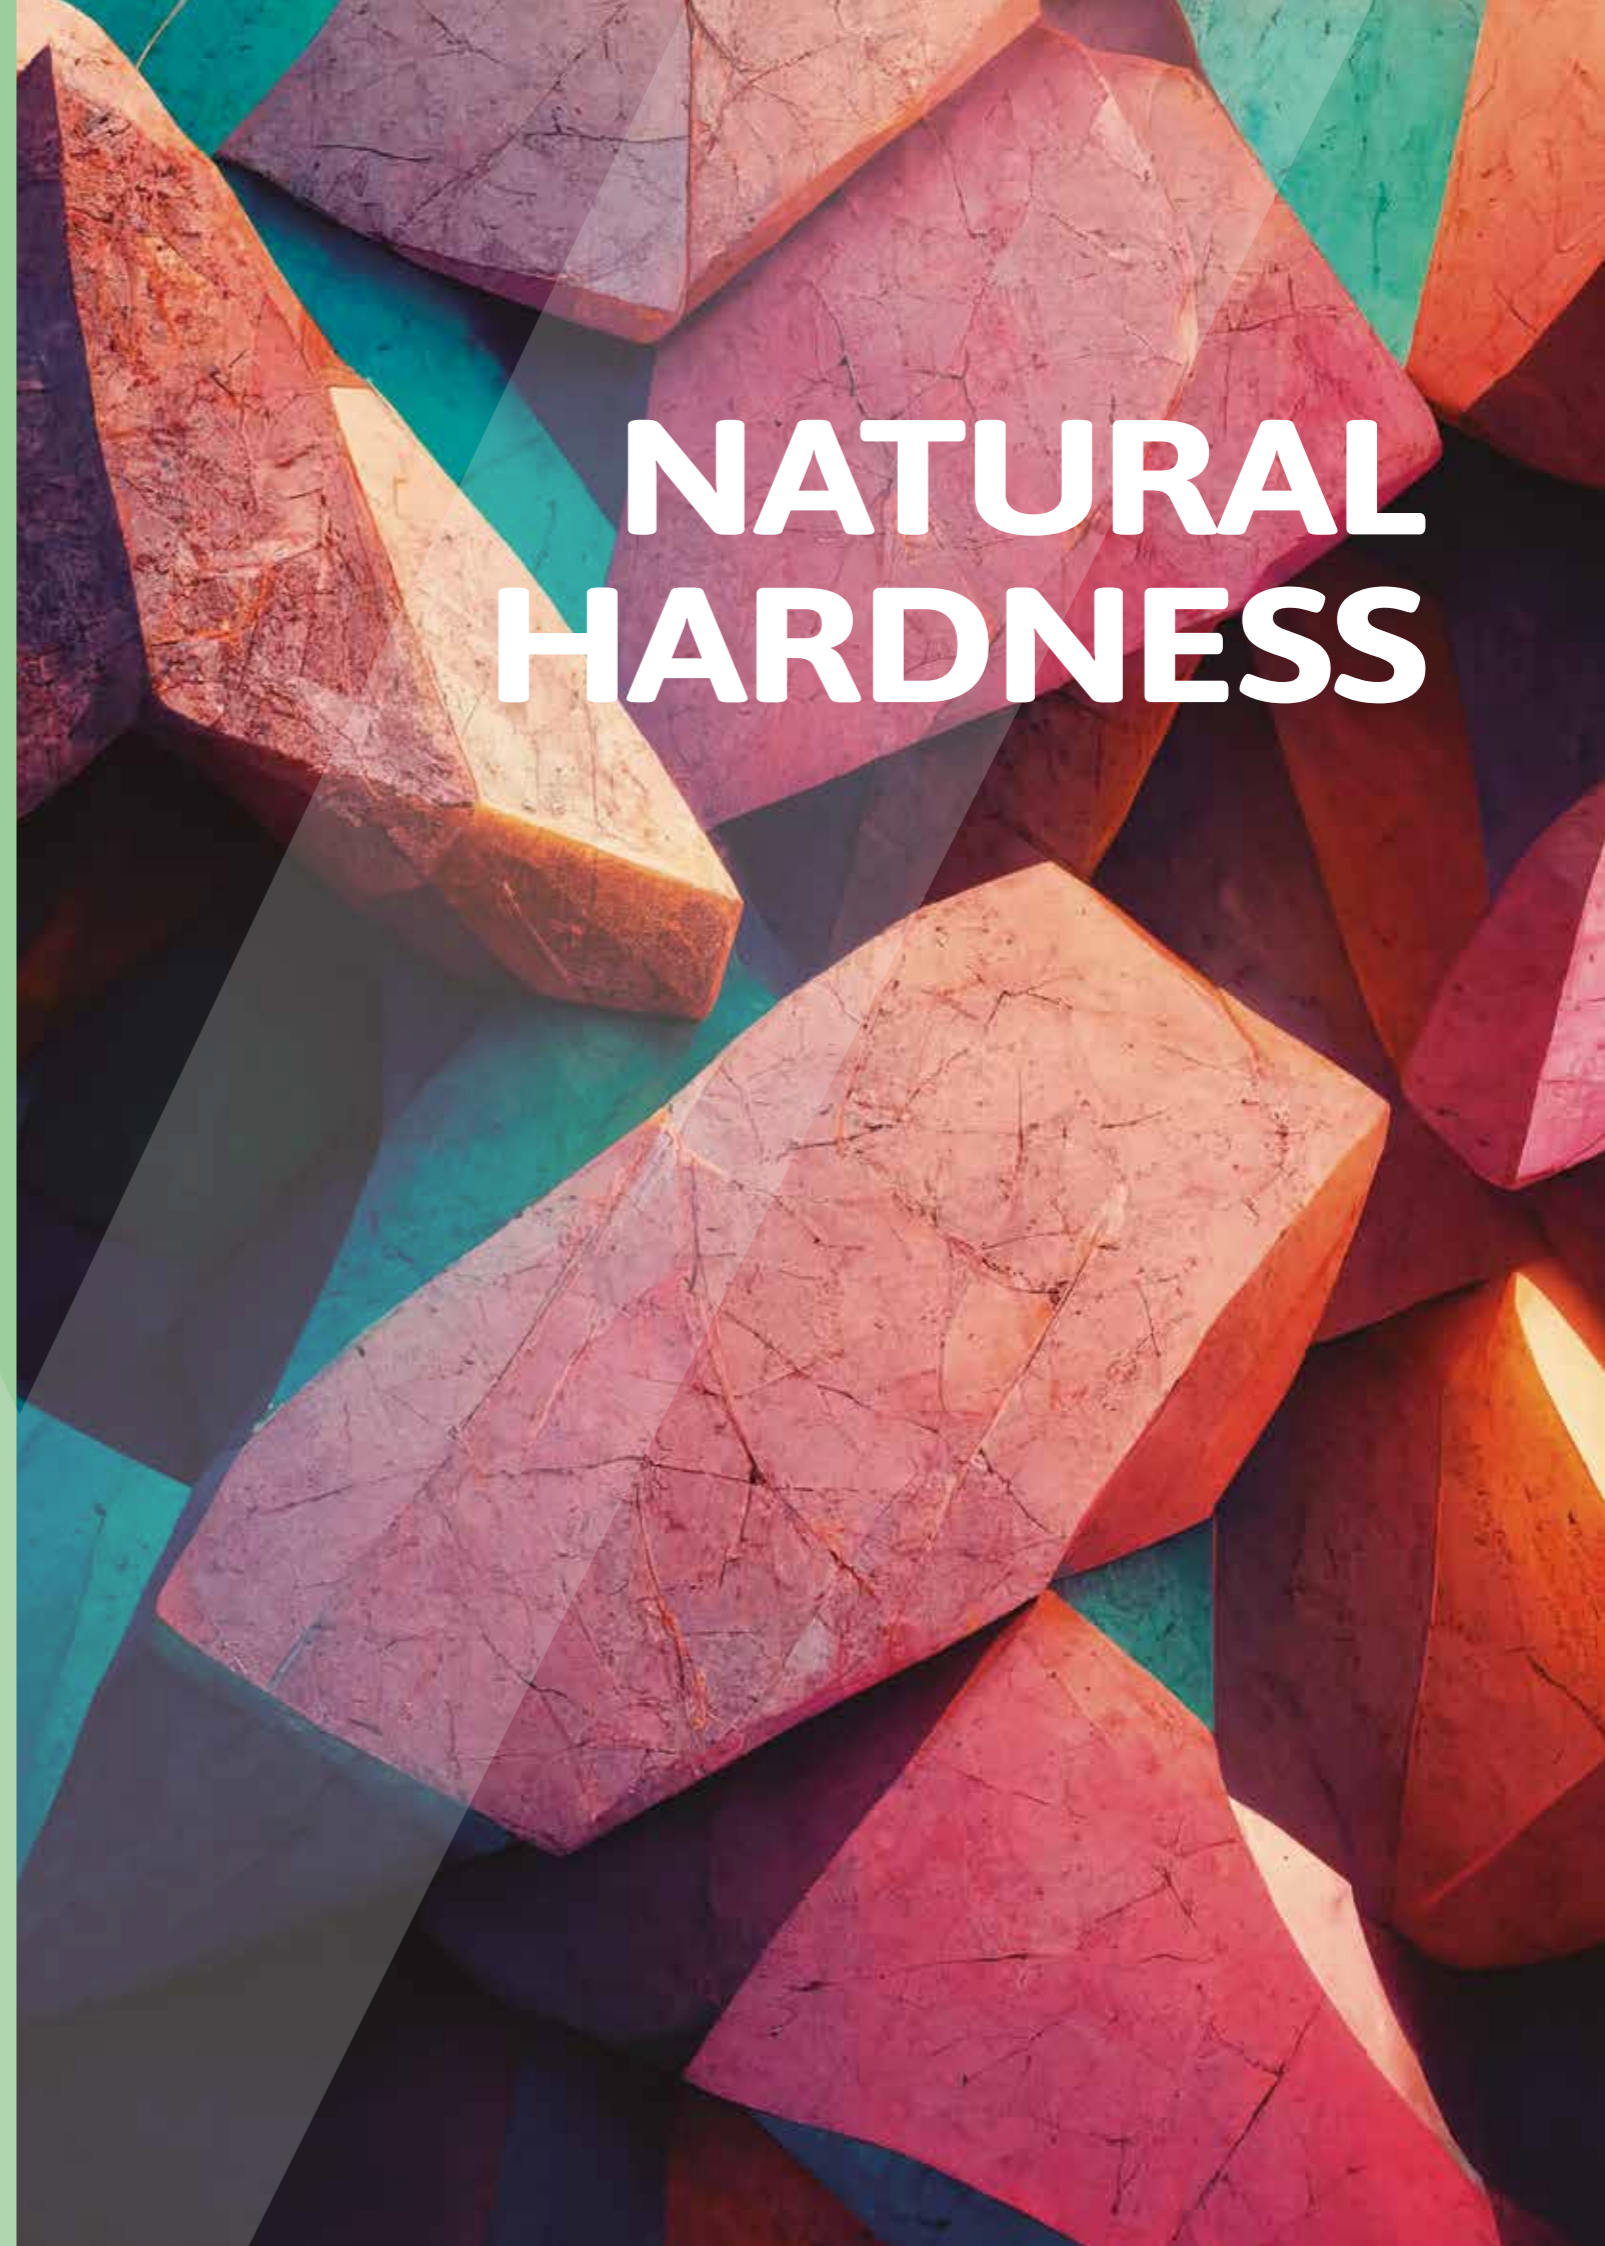

For outdoor areas, it is important to highlight, the non-need of cement glue, for fixing, due to its extraordinary technical characteristics of water absorption and mechanical resistance.

2 CM RESISTENCIA NATURAL

Les presentamos nuestras colecciones de 2 cms, de clara inspiración natural. Nuestros acabados en cemento y piedra las hacen perfectas para espacios, tanto en interior como en exterior.

Para exteriores, cabe resaltar, la no necesidad de cementos cola para su instalación debido a sus extraordinarias características técnicas de absorción y resistencia mecánica.

solutions

LAYING RECOMMENDATIONS

Correct, careful laying of Villa Cerámica, is ceramic products are vital for taking full

advantage of their technical characteristics. For this reason, the following

points are necessary:

- Check the caliber, tone and quality of the product before laying.
- Choose appropriate installation tools (toothed trowel, white rubber hammer, suction grip and rubber trowel for pointing).

- Ensure that the surface on which the material is to be laid is level, clean and insulated from damp.

- Pay special attention to the type of adhesive to be used (consult the habitual adhesive supplier), since each type of ceramic requires the appropriate adhesive. (Standard of reference: EN-1348).

- For rectangular and/or large formats (side larger than 60 cm) the use of a leveling system such as wedges are recommended to ensure a correct installation.

- The professional responsible for laying the material must choose the appropriate joints between pieces and the perimeter joints, in order to guarantee correct absorption of structural movements, and an allowance for dimensional tolerances of the product. Villa Ceramica recommends laying the tiles with a minimum joint of 2 mm and checking for other indications given on the box (measurements between calibers, recommended joint).

- Do not use colored pointing material containing black smoke (micronized carbon) or dyes which can hamper the cleaning of the tiled surface.

- Clean off excess pointing material from the surface of the tiles when it is still fresh, using a sponge and clean water; never use hard materials that could scratch the tiles, such as metal spatulas or abrasive scourers. Always follow the recommendations given by the adhesive manufacturer.

- Once the tiles are laid, avoid working in the tiled zone (plastering, painting, placing scaffolds/ladders, projecting metallic fragments from disc grinders, moving tools, dragging heavy objects, moving remains of abrasive building materials, etc.) If this cannot be avoided, always protect the tiles and joints to prevent problems of cleaning or deterioration. The materials used for this protection must not be harmful or contain chemical products which may damage the tiling.

Special for the shade variation series:

To obtain an excellent aesthetic finish in terms of design and to appreciate all of its qualities, Villa Ceramica recommends mixing tiles from the greatest possible number of boxes before starting installation. Already fixed material claims, related with the before mentioned points will not be accepted.

Special for laying rectangular formats:

When laying rectangular formats discontinuously, never do so in the center of the piece. In order to maintain the aesthetic appearance and avoid difficulties in installation, we recommend that discontinuous laying does not exceed 25% of the side to which it is applied. For rectangular and large formats (side larger than 60 cm) the use of a leveling system such as wedges are recommended to ensure a correct installation.

MAINTENANCE

To maintain the beauty and elegance of Villa Cerámica, we advise daily cleaning with conventional methods. To remove remains of dust and solids: sweeping or vacuum cleaning. Do not use dust-catcher mops with silicones and waxes. The surface must be washed with neutral soap and the amount of hot water recommended by the manufacturer. Do not use cleaning products containing wax, brighteners or similar additives, since

RECOMENDACIONES DE COLOCACIÓN

Una colocación adecuada y cuidadosa de los productos fabricados por Villa Cerámica es vital para hacer resaltar al máximo las características técnicas de los mismos. Por este motivo, es necesario:

- Verificar el calibre, tono y calidad del producto, antes de la colocación. Reclamaciones acerca de estos puntos tras la colocación no serán aceptadas.

- Escoger herramientas de instalación adecuadas (llana dentada, maza de goma blanda, ventosa y llana de goma para la aplicación de la junta).

- Que la superficie sobre la cual vaya a instalarse el material esté nivelada, limpia y aislada de la humedad.

- Prestar especial atención al tipo de adhesivo a utilizar (consultar con el proveedor habitual de adhesivos), dado que cada tipo de cerámica requiere el adhesivo adecuado. (Norma de referencia: EN-1348).

- Para formatos rectangulares y/o de gran formato (lado mayor de 60 cm) se recomienda el uso de sistemas nivelados como campanas o cuñas para garantizar una correcta colocación.

- El profesional responsable de la colocación del material, debe elegir adecuadamente las juntas entre piezas, así como las juntas perimetrales, de manera que se garantice una correcta absorción de movimientos estructurales, y una compensación de tolerancias dimensionales del producto. Villa Cerámica recomienda colocar la cerámica con una junta mínima de 2 mm y comprobar si en la caja hay otras indicaciones (medidas entre calibres o junta recomendada).
- No se debe utilizar junta de color que contenga negro de humo (carbón micronizado), ni tintes que pueden dificultar la limpieza de la superficie revestida.

- Limpiar los restos de rejuntado de la superficie de las baldosas cuando aún están frescos, utilizando una esponja con agua limpia; en ningún caso deben utilizarse materiales que presenten alta dureza y puedan rayar el producto cerámico tales como espátulas metálicas o estropajos abrasivos. Siempre se deben seguir las recomendaciones indicadas por el fabricante de adhesivos.

- Una vez colocado el azulejo, hay que evitar las operaciones en la zona alicatada (enyesado, pintura, colocación andamios/escaleras, proyección de restos metálicos de radiales, trasiego de herramientas, arrastre de objetos pesados, resto de materiales abrasivos de obra, etc.), en caso contrario, siempre hay que proteger las baldosas y las juntas para evitar posteriores problemas de limpieza o deterioro. El material que se use para esta protección, no debe dañar ni contener productos químicos que dañen al azulejo.

Especial para las series destonificadas:

Para obtener un excelente acabado estético en cuanto al diseño y apreciar todas sus cualidades, Villa Cerámica recomienda que se mezclen baldosas del mayor número de cajas posible antes de iniciar la instalación.

Especial Colocación de formatos rectangulares:

La colocación a rompejunta de formatos rectangulares nunca debe realizarse en la mitad de la pieza. Se aconseja que para mantener la estética y evitar dificultades en su instalación, la colocación a rompejunta no supere el 25% del lado sobre el que se aplica. Para formatos rectangulares y/o de gran formato (lado mayor de 60 cm.) se recomienda el uso de sistemas de nivelación como campanas o cuñas para garantizar una correcta colocación.

MANTENIMIENTO

Para mantener la belleza y elegancia de la cerámica Villa Cerámica, se aconseja la limpieza periódica del material, con sistemas convencionales. Para la eliminación de restos de polvo y sólidos: por barrido o aspiración. No se debe utilizar mopas atrapa polvo con siliconas y ceras. El lavado de la superficie se debe realizar con jabón

in time they may leave a waterproof layer on the tile which alters its surface appearance. We strongly recommend the use of doormats, which must remain clean, in entrances to tiled areas, whether from the street, terrace or garden, to prevent the entry of abrasive elements. We recommend special care in zones close to beaches or construction works, where there is a risk of sand and stones being brought in. It is advisable to place protections on objects which can mark the tiles if dragged (metal table legs, chairs, etc.), being especially careful with shiny and satin-finished products. If the tiles cannot be cleaned completely, we provide the following table showing suitable cleaning agents for each type of dirt:

type of stain - cleaning agent

Oil, ink, marker pen, tomato, fruit, chocolate, grease.

- Organic solvents: alcohol, turpentine, acetone.
- Alkaline detergents in liquid or powder form.
- Bicarbonate.

Tar, rubber, shoe polish, paint, graffiti, wax, resins, marker pen, nail varnish.

- Organic solvents: alcohol, turpentine, acetone.

Coffee, ice cream, nicotine, wine.

- Alkaline detergents in liquid or powder form.

Lime, cement, beer, metal deposits, soft drinks, fruit juices.

- Diluted acids: vinegar, hydrochloric acid.

Glue, chewing gum, tire or shoe rubber.

- Organic solvents: alcohol, turpentine, acetone.
- Diluted acids: hydrochloric acid.

Blood, mercromina, iodine.

- Oxidant: oxygenated water.

Incrustations.

- Pressurized water.

Never use any products containing hydrofluoric acid, only those indicated in the table above. All the products shown in the table can easily be found in ordinary household stores and shopping centres. Special for polished porcelain tiles: In the case of polished porcelain tiles, once all the material has been laid and the remains of cement, pointing and any other building material have been cleaned off, on some polished surfaces the presence of an 'oily' film can be observed due to the 'stainresistant' inertisation treatment they are given. If this occurs, Villa Ceramica recommends cleaning the surface with dry cleaning products (detergents in powder form) and, once this fine protective film has been eliminated, cleaning the tiles as indicated above. In extreme lighting conditions, light reflections may occur due to the high degree of brightness and the characteristics of the product.

We recommend removing stains immediately.

neutro y la cantidad de agua caliente recomendada por el fabricante. No se deben usar productos de limpieza abrillantadores, cerosos o con aditivos similares ya que con el paso del tiempo pueden dejar una capa impermeabilizante sobre la cerámica que altera el aspecto superficial de la misma. Es recomendable la colocación de felpudos, que deberán permanecer limpios, en las entradas a los lugares pavimentados, ya sea desde la calle, terrazas o jardines, para evitar la entrada de elementos abrasivos. Se recomienda especial cuidado en zonas cercanas a playas u obras que pueden aportar arenas y piedras. Es aconsejable poner protecciones a los objetos que por arrastre pudieran marcar el producto (patas metálicas de mesas, sillas, etc.), teniendo especial rigurosidad con productos brillantes y satinados. Si la suciedad no se elimina completamente, facilitamos la siguiente tabla, donde se encuentran los agentes limpiadores adecuados para cada tipo de suciedad:

TIPO DE MANCHA - AGENTE DE LIMPIEZA

Aceite, chocolate, tomate, frutas, grasa, tinta, rotulador.

- Disolvente orgánico: alcohol, aguarrás, acetona.
- Detergente alcalino ya sea en líquido o en polvo.
- Bicarbonato.

Alquitrán, caucho, betún, pintura, graffiti, cera, resina, rotulador, esmalte de uñas.

- Disolvente orgánico: alcohol, aguarrás, acetona.

Café, helado, nicotina, vino.

- Detergente alcalino ya sea líquido o en polvo.

Cal, cemento, cerveza, depósitos metálicos, refrescos, zumos.

- Ácidos diluidos: vinagre, sulfamán o ácido clorhídrico.

Cola, goma de mascar, goma de neumático o zapato.

- Disolvente orgánico: alcohol, aguarrás o acetona
- Ácidos diluidos: sulfamán o ácido clorhídrico.

Sangre, Mercromina, Yodo.

- Oxidante: Agua oxigenada.

Incrustaciones.

- Agua a presión.

Nunca hay que utilizar productos que contengan fluorhídrico, sólo los indicados en la tabla anterior. Todos los productos indicados en la tabla se pueden encontrar fácilmente en droguerías y centros comerciales habituales. Especial para porcelánicos pulidos: Una vez instalado todo el material y habiendo limpiado los restos de cemento, rejuntado y cualquier material de obra, en algunos productos pulidos, debido al tratamiento superficial de inertización "anti manchas" que se le realiza, puede observarse la presencia de una película "grasa" en la superficie de las piezas. En caso de presentarse esta situación, Villa Cerámica recomienda la limpieza de la superficie con productos de limpieza en seco (detergentes en polvo), y una vez eliminada esa fina película protectora proceder a la limpieza del producto de la forma anteriormente indicada. Por otro lado, en condiciones extremas de iluminación se pueden producir reflejos y sombras debido al alto grado de brillo y las características del producto. Se recomienda limpiar las manchas de forma inmediata.

VILLA CERÁMICA SUMINISTRA PRODUCTOS QUE CUMPLEN LA NORMA EN 14411 E ISO 13006

The production of the colours is approximate. Villa Cerámica reserves the right to alter or amend the products here stated. Due to the difference in manufacturing of raw materials and firing process between floor tiles and wall tiles, Villa Cerámica cannot guarantee the same shade between those two products and will not accept any claims for shade differences between floor/wall combinations.

La reproducción de los colores es aproximada. Villa Cerámica se reserva el derecho de alterar o modificar los productos aquí relacionados. Debido a las diferencias en la producción de la materia prima y las temperaturas de cocción entre revestimientos y pavimentos, villa ceramica no puede garantizar el mismo tono entre revestimientos y pavimentos de la misma serie. Villa Cerámica no acepta reclamaciones de tonos entre combinaciones de revestimientos y pavimentos.

La reproduction des couleurs est approximative. Villa Cerámica se réserve le droit de changer ou de modifier les produits énumérés ici. En raison des différences de production des matières premières et des températures de cuisson entre le revêtements de mur et sol, Villa Cerámica ne peut garantir la même nuance entre faïence et sol d'une même série.
